

EVERY DAY IS WORLD AIDS DAY

Perhaps AIDS has taken a friend or a loved one from you or maybe you are among the 28 Million people affected. We are there to help you navigate the uncertainties you may encounter on your journey to better health.

The Joseph P. Addabbo Family Health Center's Specialty Care Services feature a multi-disciplinary team committed to providing quality, comprehensive health and psychosocial services to those living with HIV. Our continuum of care program provides education, community and family resources along with comprehensive treatments, medical care and mental health care to treat the entire person. Our education and treatment plans include reducing the risk of acquisition and more severe complications.

We pride ourselves on our ability to reach many individuals dealing with HIV/AIDS. By providing comprehensive Specialty Care, we open the doors to better health and a better life.

Our Specialty Care Services Are Here for You

RYAN WHITE

Ryan White provides a comprehensive system of HIV primary medical care, essential support services and medications for low-income people living with HIV who are uninsured and underserved.

The Ryan White program also serves as an important source of ongoing access to HIV medication that can enable people living with HIV to live close to normal lifespans.
