

## WELCOME BACK!

The Joseph P. Addabbo Family Health Center has now begun returning to our full health services and we welcome you back to our offices. We have added new precautions to minimize the risk of COVID-19 transmission so you can focus on your health knowing that we are committed to your safety.

We have designed and implemented strict safety protocols for everyone who enters our Health Care Center according to CDC Guidelines. We have sufficient supplies of personal protective equipment (PPE) and are continuing our testing services for COVID-19.

When you visit, you will notice:

- **Masking policy enforced:** All patients, visitors and staff must wear masks over their **mouths and noses**.
- Carefully monitored entrance points
- Screening of all patients for symptoms and possible COVID-19 exposure before entering our buildings
- Waiting areas arranged for social distancing
- Enhanced cleaning of exam rooms and equipment after each patient
- Frequent deep cleaning of other spaces

- Staggered entry to our offices to prevent crowding (You may be asked to wait outside, or in your vehicle, until your provider is ready to see you.
- Installation of new protective barriers throughout the office where appropriate.

**WE ASK THAT YOU DO YOUR PART, TOO.**

**Always wear a Face Mask, maintain Social Distancing and Wash your Hands Frequently.**

**If you feel sick or have a fever, please let the staff know immediately at the front door.**

**Limit the people with you to one person unless you must care for other family members (children, elderly or disabled, etc.)**

*Together, we can make health care during this pandemic a safer experience for all.*
